

Adelaide's younger prostate cancer support group

We are young prostate cancer patients and we've put together a group for other younger prostate cancer (PC) warriors to hopefully meet up in a safe space to chat, listen and share our experiences, hope, wisdom and worries.

We've been to a few local groups now and we've noticed that being the youngest there by probably 20 years, is pretty scary and worrying! We've met some great people but not many of a similar age. So we want to create a support group for other younger men to try to help each other out whilst being on this extremely difficult and stressful journey.

If this sounds like something you'd be interested in, use the links below to join us.

We meet in person every month in the City, beginning on Thursday, June 13th.
